

*Lower emissions,  
better solution.*

**From lamination to application,  
Brianza Plastica helps you  
reduce VOC emissions  
at every stage.**

*Lower emissions,  
better solution.*

Lower emissions during processing for healthier working environments

Reduced VOC emissions from the finished product, both into the environment and enclosed spaces.

Compliant with the most stringent parameters of the new European regulations on VOC reduction.

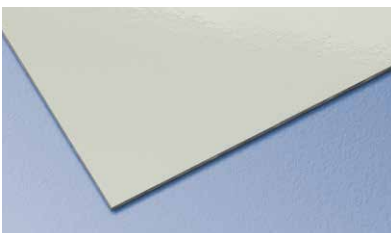

With its new LoVOC laminates, Brianza Plastica provides a concrete, high-performance and cutting-edge solution that meets the growing demands for sustainability in manufacturing, as well as the **latest European regulations** on the reduction of **Volatile Organic Compound (VOC)** emissions. This range of laminates combines innovation, sustainability and a focus on health, anticipating the needs of a market increasingly aware of environmental impact and workplace quality.

Developed through years of dedicated research, the **innovative resin** used in LoVOC laminates reduces emissions throughout the product's entire life-cycle. This results in **healthier** working environments and more sustainable production processes, **enhancing every project** with high performance and a strong commitment to health and environmental responsibility.

### LoVOC is available in the following product ranges:

#### ELYPLAN STD

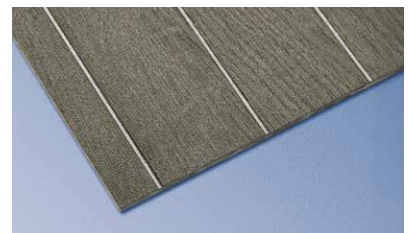

Elyplan Std is known for its excellent value for money, making it an effective solution at a competitive price.

#### ELYPLAN EXTRA-GLASS

Elyplan Extra-Glass combines light weight with high mechanical strength in a single product.

#### ELYPLAN DESIGN STYLE

Elyplan Design Style stands out for the versatility of its finishes, directly integrated into the production line.
